POP3 Mail Server: mail.naspa.net
SMTP Mail server: mail.naspa.net
News Server: news.naspa.net
Home Page: <http://www.naspa.net>

Remote Access Services Installation

From the *Start* menu, select **Settings, Control Panel**.
Double click **Network**.
Click the **Service** tab.

Note: Locate whether or not you have Remote access service icon installed. If it is not listed then continue with the next step. If it is installed then skip to *Configuring the Remote Access Service*.

Click **Add**. Select **Remote Access Service**.
Click the **OK**.

Configuring the Remote Access Service

Click on the **Remote Access Service**.
From the *Start* menu, select **Settings, Control Panel**.
Double click **Network**.
Click **Properties**.
Click **Add** and the menu will appear with the option to select what type of modem you have installed.
If necessary, click on the appropriate modem. If one is not installed, click **Install modem**.
The connection should be dial out only.
Click **OK**. Again, click **OK**. Restart the computer.

Configuring the Dial-Up Network

Double click **My Computer, Dial-Up Networking**.

Click **OK**.

Enter Phonebook entry, *Naspa Internet*

Select **The non-Windows NT server I am calling expects me to type login information after connecting, or to know TCP/IP addresses before dialing**.

Check PPP

This information can be found in the section titled *Naspa Internet Numbers/Server Names*

Login Script: None

Phone Number- see above

Click **Next**. Click **Finish**.

Checking Properties of the Dialer

Double-Click **Dial-Up Networking**.

Choose the appropriate service.

Click **More**. Click **Edit Entry and Modem Properties**.

Click the *Security* tab, click **Accept any authentication**.

Click **OK**.

Connecting with the Dialer

Double click **My Computer, Dial-Up Networking**

In the *User Name* section, type **youruserid** in lower case letters.

In the *Password* section, type **yourpassword** in lower case letters.

Click **Connect** to establish a connection with Naspa Internet.
